

Autoscope® RackVision™ Terra™ System 16

The Autoscope® RackVision™ Terra™ System 16 is a multi-camera video detection solution for tunnels, bridges and highways. The system delivers field proven incident detection and traffic data collection to promote safe and efficient traffic flow on roadways worldwide.

With innovative Terra Technology you will appreciate the processing power, web browser communications, streaming digital video and ease of setup and use. EasyLink™ broadband connectivity provides simple connection to your traffic system communications network.

From pedestrian detection in tunnels to slow moving vehicle detection on the roadway, the Autoscope RackVision Terra System 16 is a cost effective and comprehensive solution for your transportation projects.

APPLICATIONS

- > Traffic incident management
 - Highways
 - Tunnels
 - Bridges
- > Traffic data collection and analysis
- > Work zone safety and traffic control
- > Traveler information systems
- > Journey time (travel time)
- > Remote video surveillance

FEATURES

- > Vehicle detection, traffic data collection and incident detection
- > Up to sixteen (16) modular video input channels (PAL, CCIR, NTSC or RS170)
- > Dual-core processor for advanced image processing
- > MPEG-4 digital streaming video output or analog output
- > EasyLink broadband communications
- > IP addressable
- > View video from remote locations using Internet browser
- > Fail-safe outputs

BENEFITS

- > Cost-effective solution for traffic management
- > Field-proven accuracy and reliability
- > Easy to install and configure
- > Flexible design meets a variety of detection objectives
- > Superior value and performance compared to other detector systems

SPECIFICATIONS

Power

- > 85 to 264 VAC, 220W maximum
- > Consumption, current
 - @110 VAC: 1.45A
 - @230 VAC: 0.69A
 - @24 VDC: 6.65A

Video

- > Input
 - PAL, CCIR, NTSC or RS170
 - One composite 75Ω 1 Vpp, BNC connector on backplane for each RackVision Terra System Module (SM) card
- > Output
 - PAL or NTSC
 - Two RJ-45 connectors on backplane for 10/100/1000 Mb/sec Ethernet connectivity
 - One (1Vpp), BNC connector for each Terra module on backplane
 - MPEG-4 digital streaming video via EasyLink
 - Analog

Communications

- > RJ-45 connector on front of Com module for 10/100 Mb/sec Ethernet connectivity

Detector I/O

- > Outputs
 - Eight (8) per video channel (open collector, selectable active low or high) via backplane
- > Inputs
 - Four (4) per video channel via backplane

Environmental

- > -34° C to +74° C (-29° F to +165° F)
- > 0 to 95% relative humidity

Dimensions and Weight

- > H x W x L
 - 133 mm x 483 mm x 217 mm
 - (5.25 in x 19.00 in x 8.56 in)
- > 6.4 kg (14.0 lbs) max

Warranty

- > Two-year warranty
- > Extended warranty package available

Regulatory

- > CE EN 55022, EN 61000-6-1, EN 60950

SETUP AND OPERATION

The Autoscope RackVision Terra System 16 is easy to install, setup and customize to meet your requirements.

- > You can assign detector outputs to provide vehicle presence and alarms to traffic control and monitoring equipment.

Simple mouse and keyboard commands create detection zones for:

- Tunnels
- Highways
- Bridges

- > Real-time or stored traffic data includes:

- Volume
- Occupancy
- Speed
- Classification

- > You can assign incident alarms to discrete detector outputs or send to a traffic management center via a communications network. Incidents detected include:

- Stopped vehicles
- Wrong way vehicles
- Slow moving vehicles
- Pedestrian
- Debris
- Smoke/fire

- > You can quickly integrate traffic data into your own application using the optional Autoscope Software Developer's Kit (SDK).
